The National Hurricane Center normally issues public advisories on their website and to the media for Atlantic tropical cyclones every six hours at 4:00AM CDT, 10:00 AM CDT, 4:00 PM CDT, and 10:00 PM CDT. Intermediate public advisories may be issued every 3 hours when coastal watches or warnings are in effect, and every 2 hours when coastal watches or warnings are in effect and land-based radars have identified a reliable storm center. Additionally, special public advisories may be issued at any time due to significant changes in warnings or in the cyclone.

NOAA Weather Radio

Not manufactured by NOAA, NWR receivers can be purchased at many retail outlets and on the Internet

NOAA Weather Radio (NWR) All Hazards is a nationwide network of radio stations broadcasting continuous weather information directly from a nearby National Weather Service office. NWR broadcasts National Weather Service warnings, watches, forecasts, and other hazard information 24 hours a day.

ALABAMA CONTRAFLOW FOR HURRICANE EVACUATION

To provide additional roadway capacity during hurricane evacuations from the Gulf Coast, a portion of I-65 may operate entirely in the northbound direction, meaning both southbound lanes of I-65 would be converted into northbound lanes. These lanes are called contraflow lanes.

I-65 NORTHBOUND – Contraflow begins in Baldwin County just south of Exit 31 (State Road 225). A paved crossover at that location allows motorists traveling in the normal Northbound lanes to transition (crossover) to the contraflow lanes.

Contraflow ends in Montgomery just north of Exit 167 (U.S. 80). Motorists in the contraflow lanes will crossover into the two left lanes of the normal northbound lanes. Motorists travelling in the normal northbound lanes will merge into the two right lanes and continue north and onward to their destinations.

I-65 SOUTHBOUND – During contraflow, southbound traffic travelling on I-65 through Montgomery will be directed to exit the interstate at Exit 167 at U.S. 80 and then onto U.S. 31 South. From Montgomery southward, all southbound I-65 traffic is detoured to U.S. 31. Eastbound traffic on U.S. 80 cannot enter I-65 at Exit 167 and will be directed to U.S. 31.

Southbound traffic cannot use I-65 between Montgomery and Mobile during contraflow.

Tune into the Highway Advisory Radio System (HARS) for updated information. Look for advisory signs in these areas. Mobile area – 1630 AM • Montgomery area – 1690 AM
